DAVID S.V. HALL, AIA

Vice President

David S.V. Hall, AIA serves as Vice President of PIKE – McFARLAND – HALL ASSOCIATES, INC. with 19 years experience in architectural experience prior to joining PMH.

Beginning from his early teens David has been involved in the Construction industry which afforded him the opportunity to gain diversified experience in a variety of trade disciplines in residential, commercial, educational and institutional projects before pursuing a career in Architecture. After his career began in Architecture David also gained invaluable engineering experience in the areas of Civil, Structural, Plumbing, Mechanical and Electrical disciplines which has been useful during initial conceptual development of project design solutions.

In 1979 David joined a small sized architectural firm in Greenville, S.C. in which he gained experience with schematic design, design development and project management of contract document development. Then in 1993 David accepted a project management position with a medium sized Architectural firm also in Greenville which afforded him the opportunity of experiencing the full realm of architectural services. In 1994 David relocated his family to Myrtle Beach and accepted a position with the architectural firm of Wilkins, Wood, Goforth, Pike Associates, Ltd. as a Project Manager before joining Pike McFarland Associates, Inc. in 1998.

David's firm responsibilities include project management, project architect, construction observation and administration and general business administration. His experience with AUTOCAD (currently R14 V2013 provides him with the expertise necessary to organize and produce documentation for a variety of building types varying in complexity and scale.

Project types which David possess' knowledge of include educational, multi-plex theaters, factory/warehouse, faith based, multi-family, mid-rise resort, residential, recreational, mercantile/retail centers including mall space up-its, prison/jail facilities, library, governmental, assisted living and commercial office facilities.
